Nikhil Bhardwaj

Sr. Software Developer @ Mobile Programming LLC | Building Innovative Software Solutions
Delhi, India

Summary

- React & Next: Creating powerful and engaging experiences, faster than ever.
- HTML & CSS: Building beautiful websites from scratch, pixel by pixel.
- Material UI & Tailwind: Powering up my designs with pre-built blocks for speed and consistency.
- Git: Keeping track of every change, like magic!
- JavaScript: Adding interactivity and making websites come alive.
- Vue & Nuxt: Building awesome web apps that are easy to manage and scale.

**I'm all about making cool stuff people love to use! **

Experience

Mobile Programming LLC
5 years 2 months

Sr. Software Developer
September 2021 - Present (5 years 2 months)
Gurugram, Haryana, India

Worked on multiple projects from scratch and bug fixing and gather requirements from clients and implement new features and jira stories, also worked on multiple POC prototype models.

Software Engineer
September 2021 - Present (5 years 2 months)

Bug Fixing: Proactively identify and resolve bugs in existing application. Proof of Concepts (POCs): Successfully design and implement proof of concepts to validate the feasibility and potential of new technologies. Project Initiation and Development: Lead the development of new projects from inception to completion, including requirement gathering, architecture design, implementation, testing, and deployment. Cross-Technology Expertise: Demonstrate versatility by working with multiple technologies beyond

JavaScript, such as Python, Unity, WebGL, Contentful, GraphQL, SonarQube or others, to deliver comprehensive solutions tailored to project requirements. Diverse Project Experience: Contribute to the development of various types of applications, including admin panels, eCommerce platforms, payment gateways, and more, showcasing adaptability and domain knowledge. Team Collaboration and Code Reviews: Collaborate effectively with cross- functional teams, conduct code reviews, and provide constructive feedback to enhance code quality and maintain consistency across projects. Project delivered/ onGoing: UVDI-360, TinBuilding, Briq, VBOTickets, LaunchXR, 8081 Crypto trading, Airport Appliances (e-commerce)and few more contributions and POC's.

Bluelupin Technologies Pvt. Ltd.
